200 mln of happy kids

High quality

2800 material variants

Over 50 countries all over the world

Advanced production processes

Up to 30 years' guarantee on components

EN 1176

Compliant with safety standards

ISO

ISO and TÜV certificates

A new era for Vinci Play

Vinci Play is a company bringing happiness to children all around the world.

At Vinci Play, we focus on people who, working in the spirit of sustainable development, create colorful, aesthetic and safe playground equipment that bring happiness to children around the world.

Our inventive designs stimulate children's unbridled curiosity while encouraging them to play together. Millions of satisfied children play on our products every day which are installed in over 50 countries around the world.

Operating on a global market, we understand how important it is to consciously manage our social, environmental and organizational impacts. We listen carefully to the opinions of our stakeholders, look for new solutions every day and never lose sight of what is most important such as business values.

Our professional approach makes us a reliable business partner for companies and institutions that are looking for a competent manufacturer of playgrounds. Our factories are equipped with the latest equipment, including welding robots, 3D and 2D lasers and many other devices, enable efficient and effective order fulfillment. Overall, we employ over 300 people from around the world, and we all have one goal: to witness children's joy in a safe, inspiring and fabulously colorful environment.

We care for the environment

For years, we have been producing construction elements for playgrounds based on modern technologies of plastic waste processing. Since 2014, the cores of all HDPE panels that we use in our production of play equipment are made of recycled materials. On the other hand, wooden structures of Vinci Play playgrounds are made of wood obtained in accordance with the principles of sustainable forest management. Consequently, we support the ecological balance of our planet. Recycled devices are a perfect fit for global efforts to keep lands and oceans clean, lower the emission of carbon dioxide and to protect the earth's precious resources. Separation of plastic waste and its processing into eco-raw materials are an important element on the way to the "green" future of our children and future generations. Meet the eco-methods of Vinci Play:

Roofs, side panels and manual elements are made of HDPE panels, which are made of recycled ocean nets and ropes.

The construction posts of the equipment are made of highly durable raw material, which is made of recycled textiles and foil.

Using raw Robinia acacia wood, without any chemicals in the form of impregnations and paints, we contribute to the reduction of CO_2 emissions.

Wooden elements of playgrounds are made of wood from certified suppliers managing forests in accordance with the principles of sustainable forest management.

Get to know our ecological solutions

Recycled products

For years, we have been striving to ensure that each element of Vinci Play playgrounds is safe for children and the natural environment. Our posts are made of ecoraw material, which is made on the basis of an innovative technology of processing used clothing and foil. This highly durable, eco-friendly material successfully replaces plastics in towers and ladder structures. Thanks to this, we reduce the amount of textile and foil waste in landfills and incinerators, thus reducing the emission of carbon dioxide to the atmosphere.

Sustainable raw materials

100% ecological playground? With us, it is possible. Not only posts, but also “green” HDPE panels, which we use to build roofs, side panels and other structural and manual elements of Recycled devices, are made of recycled material. As a result, fishing ropes and nets no longer litter the oceans and land, but constitute a solid building material for our eco HDPE panels. This way, we become part of circular solutions for a clean natural environment and the future of all of us.

Wood from sustainable forest management

Pleasant to the touch, good-quality wood is the basis of a playground that is friendly to children and adults. When building with wood, we do not want to harm nature, which is why our wood comes from certified farms based on the principles of sustainable forest management. We choose suppliers who source wood in such a way as not to reduce forest resources and preserve their biodiversity.

Take care of the planet with Vinci Play

LOW CO_2 EMISSION

At Vinci Play, we want the free fun and joyful laughter of children to resonate in a clean, green environment, both now and in the next several dozen years. That is why we use what is best for the youngest and the natural environment - innovative post-consumer recycled materials. By using recycled materials, we help to reduce the incineration and storage of plastic waste, and we also support the development of new technologies for their processing.

Recycled plastic

We have replaced ordinary plastic with raw material made from used ropes and fishing nets. By using “green plastic”, we reduce the amount of plastic waste on land and in the oceans.

Textile waste

Our durable posts are made of used textiles and foil. Recycling clothes and bags is key to reducing carbon dioxide emissions and reducing waste in landfills.

Wood

Our wood comes from controlled farms that care for biodiversity and ecological balance. Sustainable forest management prevents unfavorable climate changes.

Choose wisely

Now together we can make sure that the present and future generations grow up in safe and healthy environment. By choosing Recycled devices, you will build an ecological playground consisting of structural elements made of post-consumer waste.

Our “green” playgrounds are made of used textiles, foil and ocean nets. In this way, from waste that previously polluted the soil and air, we now create cheerful eco-places for creative play. Recycled devices are not only climate neutral, but also very durable and safe to use.

Playgrounds complying with the principles of the circular economy are our goal, which we persistently pursue. That is why we choose raw material suppliers who recover and process post-consumer waste, minimizing their negative impact on the environment. Ecological playgrounds are a choice for a healthy future for all of us.

Sustainability at Vinci Play

At Vinci Play, we have been ensuring stable and sustainable growth for many years. Operating on a global market, we understand how important it is to be aware when managing our social, environmental and organizational influences. We listen carefully to the opinions of our stakeholders, we look for new solutions every day and never lose sight of what is most important such as values in business.

Sustainable development is one of the key foundations supporting Vinci Play's business growth strategy. We persist in efforts to ensure that our operational activities support the implementation of the UN Sustainable Development Goals. Our intention is to implement the assumptions of the ESG strategy by 2026, which includes 73 tasks that maximize our positive impact in the value chain. We reflect the global partnership for sustainable development in three pillars which are responsibility: towards people, the planet and the community. Each of them pursues specific goals that provide an answer to the expectations of our stakeholders: employees, customers, social and business partners.

Continuously we invest in social potential, responsible resource management, and product safety and quality. We develop our portfolio in the spirit of a circular economy, we focus on the development of renewable energy sources and education ecological. We want our products to support the development of social bonds in every corner of the world. We believe in strength collective partnership, which is why we are an active signatory of real transformations of the world, which are practical emanation is contained in the maxim "conscious participation in a positive transformation for the good of future generations".

For Society

Vinci Play will support social dialogue and involvement. We intend to develop related projects with ecological education and supporting intergenerational integration and the development of social bonds in the places where we operate. The goals we set for ourselves in this regard include: improving the ESG management structure, raising standards ethics and respect for the rights of stakeholders.

For the Planet

We will intensify actions to mitigate the effects of climate change. We are planning the transformation of our offices and production plants. We will innovate in terms of designing and expanding the product portfolio in spirit circular and low-emission economy, as well as responsible use of natural resources. The goals we set for ourselves in this respect, there is an increase in, among others, measuring carbon footprint emissions, investing in renewable energy, increasing recycling and upcycling of waste.

For the People

Vinci Play intends to increase its efforts to support development of the company's employee potential. The company intends to implement numerous projects in the field of employee safety and health and diversity management. The goals we set for ourselves in this respect, among others: an increase in satisfaction of our employees and establishing partnership cooperation throughout value chain.

What makes us unique

Advanced production processes

From the design, through production, all the way to shipping, the highest quality and safety of the playground are our priorities at every step of the way. In the production process, we implement only certified materials, and the multi-stage quality control system ensures that all equipment components that leave our production line meet stringent safety norms.
We employ top specialists in their field who ensure a high standard of our products, reliable customer service and professional maintenance service of the equipment. Our modern machine park and advanced production organisation facilitate 4-week order processing. We also offer products with a 7 and 14-days production time and goods that are available directly from the warehouse.

We are proud to offer children, their parents and guardians the guarantee of carefree fun and relaxation on the playground, thanks to the strict safety procedures and quality standards implemented within our company.

Customer service

Our Customer Service department operates guided by the highest standards of cooperation, confirmed by the ISO 9001: 2015 certificate. The employees of this department endeavour to respond to inquiries addressed to the company within the shortest time possible while meeting the expectations of even the most demanding buyers. We guarantee cooperation based on the understanding of the customer's needs and offer full support at every stage of the contract execution, during the warranty period and afterwards.

Care for the environment

Care for the natural environment constitutes a vital aspect of our business activities. FSC® certificate number RINA-COC-000904: (licence number FSC® C163573) confirms the use of materials from well-managed FSC certified forests and other controlled sources. We follow the principles of sustainable development in all our undertakings, including the selection of contractors and suppliers. We hold the ISO 14001: 2015 certificate, which confirms the implementation of an environmental-management system.

Standards and safety

Children's safety is of the utmost importance to us, which is why all Vinci Play equipment complies with the EN 1176 European standard. The products also hold the TÜV Rheinland or TÜV SÜD certificate, which confirms their safety and high quality. Our high-end specialists support the Customer during the play-ground planning process to guarantee the compliance of the project with the applicable EU safety standards.

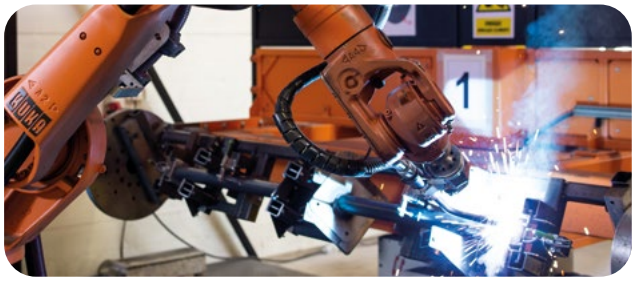

Quality control

All the elements that make up the final Vinci Play equipment undergo a multi-phase and precise quality control to ensure that they comply with the EN 1176 standard. Our quality specialists use modern laboratory, as well as devices and measuring equipment to evaluate the quality of materials at every stage of production – from the acceptance of goods or components, through all manufacturing steps, all the way to packaging and preparation for shipment. Owing to regular controls and audits of our suppliers and contractors, we make sure that we cooperate only with verified companies.

Laser steel cutting

The LC5 laser, which is the most modern integrated system for cutting profiles and metal sheets, enables optimal metal processing parameters, allowing to obtain the best results in the shortest time.

Welding robots

Welding robots working on matrices built especially for our needs. They increase efficiency thanks to the possibility of carrying out welding processes in a continuous manner. The quality of welding connections is at the highest level thanks to the use of the latest CMT technology. All robots work on high-class welding machines.

Steel welding

Our products are characterised by the highest quality of welds and a precise finish, which guarantees safe use and durability of our playground equipment. A team of highly-qualified welders, supported by cutting-edge welding robots, ensures the finest quality connections of the steel components.

Abrasive treatment (shot blasting)

The steel used to manufacture the Vinci Play playground equipment is subjected to a shotblasting cleaning process which allows us to obtain the proper surface, as well as even welds and edges. This ensures better paint adhesion, thus making the product even safer, more durable and even more aesthetically pleasing.
We use professional shot-blasting chambers to process elements of different sizes. For hot-dip galvanised steel, we use electrocorundum shot blasting, and in the case of carbon steel, we employ shot blasting using broken cast steel shot.

Powder coating

Our products are aesthetically pleasing and are available in a wide range of colours thanks to the modern powder coating line. We use the highest quality, child-safe paints which hold the QUALICOAT certificate. Our powder coating process complies with strict standards for the temperature of paint heating, coating thickness and adhesion of the paint to steel elements.

Welding of stainless steel tubes

The entire production process of stainless steel tube slides is performed by highly-qualified Vinci Play employees. They design the tubes, then roll them with high precision, match all the elements of the device, and finally, connect the components using durable and secure welds. At Vinci Play, we implement high-quality AISI 304 and AISI 316 stainless steel.

Galvanisation

We always galvanise steel components before applying powder paint. Galvanisation offers effective protection of the metal surface against corrosion caused by atmospheric conditions. We use two types of galvanisation: powder and hot-dip. We store metal components galvanised with the help of both techniques, as this allows us to swiftly process orders of our customers.

Processing ropes

We use the highest quality 16mm-thick steel ropes with polypropylene or nylon braiding for the manufacturing of climbing equipment and components, as well as for bridges and interlaces. We link them with durable fasteners made of plastic, stainless steel or aluminium. The rope elements are dimensioned, cut to the appropriate length, and then connected using hydraulic presses with a pressure of 150 tons.

CNC

We purchase the HDPE and HPL sheets that we use for the production of our equipment from leading manufacturers around the world. This ensures that we use components of the highest quality. The plates are machined using CNC milling plotters which guarantee precise cutting and milling. The desired shapes and millings – compatible with even the most complicated design requirements – are characterised by their high aesthetic and educational values and at the same time meet the highest standards of safe use.

Robinia cutting and milling

The 5-axis Robinia acacia wood cutting and milling machine is an excellent tool for precise execution of even the most complex details. Complemented by meticulous manual work in surface grinding, allows us to achieve the best results for production of the Robinia series.

Hand made finish

Our experienced carpenters passionately process and finish all wooden elements by hand, and each piece of equipment is built individually. The process is complemented by modern 5D machining centres, which precisely prepare repeatable details. This way, we produce the highest quality elements, fast order fulfilment, and high production efficiency.

Wood processing

CNC saws and industrial robots precisely cut and machine the wood used for the production of wooden parts of our playground equipment. Chamfering of the wood removes any sharp edges, and four-sided surface sanding prepares the wood for the impregnation process. The high quality of wooden elements guarantees the safety of the equipment, and the automation of the process ensures short manufacturing time and fast order realization.

Wood painting

For the production of our wooden equipment, we use pine wood which has been glued together in plies under pressure. The process of machining square timbers, which entails sanding, impregnation, painting, drying and hardening, takes place on a fully automated production line. The wood undergoes a multi-stage protection process, which guarantees long-term durability of the wooden parts of our equipment and makes them resistant to weather conditions.

Materials and components

At Vinci Play, we believe that every detail matters, therefore, for the production of our equipment, we use the highest quality materials and components with certificates, and cooperate with world-renowned manufacturers. Only thanks to this we are able to obtain the final product, which is not only aesthetic and functional, but also safe and compliant with applicable standards.

Wood

Laminated wood with a cross-section of 90 mm x 90 mm. Top-quality first-class wood: without knots, uniform colour, straight grain. Ground, impregnated and varnished over a multi-stage production process. Protected from the top with durable plastic covers and from the bottom with hot-dip galvanised steel anchors, which secure the wood against direct contact with the ground, and thus prevent the development of rot, consequently extending its life span.

Robinia wood

Acacia is the most durable wood found in Europe. The wood is characterized by natural, light colours. It does not require impregnation due to the content of many oils, which naturally protect the material very well against weather conditions, rotting processes and pests. Acacia is distinguished by exceptional hardness, resistance to moisture or contact with soil. We obtain this wood from European FSC®-certified forests and other controlled sources.

Stainless steel

An AISI 304 or AISI 316 stainless steel construction used for the production of playground equipment, slides, tube slides, fasteners and chains. With a smooth surface, it is completely weather-resistant, thus ensuring its long life span.

Steel components

A steel construction of components is made of profiles with various cross-sections. It is available in the following options:

- hot-dip galvanised and powder coated with UV-resistant paints holding the QUALICOAT certificate,
- as a steel construction: shot-blasted, iron-phosphated, powder galvanised and powder coated with UV-resistant paints holding the QUALICOAT certificate.

Composite posts

The durable posts are made of highly resistant raw material with tough surface, which is made of 100% recycled textiles and foil. Recycling clothes and bags is key to reducing carbon dioxide emissions and reducing waste in landfills.

HEXA platforms

Anti-slip and waterproof HPL or, optionally, waterproof anti-slip plywood. Cross-structured plywood coated with a hot-pressed phenolic film with a honeycomb surface imprint – it offers increased resistance to abrasion, mechanical damage and chemical agents. It is PEFC-certified.

Recycled HDPE

Green high-density polyethylen panels made of 100% recycled ocean waste such as fishing ropes and nets are used in producing roofs, side panels. This ecological material has high resistantce to weather conditions and is UV stabilised, which make them very durable and safe to use.

HDPE

HDPE is a high-density polyethylene. It represents a high-quality material which is resistant to atmospheric agents, i.e. it is waterproof, resistant to frost, UV radiation or moisture. We use three-layer plates (with a black core made of 100% recycled granulate) for the production of various panels, roofs and other playground components.

HPL

HPL is a duroplastic laminate cured with polyurethane-acrylic resins, forming a highly resistant surface layer that protects against external factors. HPL sheets are resistant to chemical and biological factors, UV rays and fluctuating weather conditions. This laminate is used for the production of various types of panels, roofs and other playground components. It is PEFC-certified.

Printed polycarbonate

An excellent alternative to glass, a very durable material with similar transparency, and at the same time twice as light and 200 times more resistant to impacts. Additionally, it is resistant to weather conditions, including UV rays and a wide range of temperatures. Used by us for the production of panels, covers and windows or spherical 3d windows (portholes).

PP tunnels

Tunnels with a double wall resistant to deformations, made of PP (diameter of 500 or 600 mm). Resistant to wear and tear, acts of vandalism and external factors.

Ropes

Galvanised steel ropes with a diameter of 16 mm, covered with polypropylene or nylon, connected with plastic, stainless steel or aluminium connectors, resistant to UV radiation, abrasion and rot.

Climbing stones

Colourful climbing stones made of durable composite resin with mineral fillers; resistant to abrasion and UV radiation.

Slides

Slides are made of AISI 304 stainless steel, resistant to acts of vandalism and external factors. Our offer also includes versions made of fiberglass. The side panels of a slide are made of HDPE or HPL sheets, which are resistant to weather conditions, including frost and UV radiation.

Inox slides

Slides made of AISI 304 stainless steel, resistant to vandalism and external factors. Made with attention to every detail, with the highest quality welds, they are an elegant finish for products for playgrounds.

Tube slides

Slides made of certified AISI 304 and AISI 316 stainless steel. Sheet thickness: 2.5 mm, diameter of the slide: 790 mm, sanded surface. The length of the slide exit depends on the length of the slide itself, the exit cap is made of a pipe with a diameter of 33.7 mm. Available variants: straight, curved or spiral (360 degrees). The tube slides meet the EN 1176 Standard.

PE tubes

Made of colourful, impact-resistant and scratch-resistant polyethylene (PE) with inside diameter approx. 75cm. Tubes are available in various bright colours, shapes (straight, curved, spiral) and from different heights.

Anchors

In wooden products we use hot-dip galvanised anchors protecting wood against direct contact with the ground. They prevent rot, thus extend the lifespan of wooden products and ensure many years of use.

Chains

Certified AISI 304 and AISI 316 stainless steel chains.

Protective plugs

Rubber or polypropylene protective plugs protect the main construction profiles against weather conditions and children from injuries.

Bolts

AISI 304 and AISI 316 stainless steel or galvanised bolts are secured against external factors by durable polyamide caps. This makes our equipment resistant to wear and tear as well as to changing weather conditions.

Movable elements

Elements from the Fitness series based on two groups: the Swiss articulation system – safe, durable and long-lasting, allowing fully guided movement, resistant to overload, weather conditions and vandalism, with a mechanical stop and a durable bearing system closed in the casing, thanks to which it does not require lubrication and maintenance. These parts ensure a long service life of devices with moving parts.

Guarantee

The highest quality of our products is ensured by experienced specialists and high quality materials. That is why we can offer our customers a long-term guarantee of fault-free and fully safe use of our devices. We also provide post-warranty services. Orders for most spare parts are completed within 48 hours.

Selected warranty periods:

30 year guarantee

Structural strength of steel and stainless steel components

15 year guarantee

Structural failure of steel and stainless steel, for dynamic equipment; structural elements made of Robinia wood

10 year guarantee

Structural failure of high-density polyethylene and high-pressure laminate components; construction elements made of 100% recycled material

5 year guarantee

Corrosion of stainless steel and hot-dip galvanized and powder coated components; against bark beetles and rot in case of wooden structural elements

More information on other warranty periods for selected parameters - available on request in the Guarantee Card.

3D planner
by Vinci Play

Design your playground

Design a functional and safe playground with the 3D planner application. Thanks to this user-friendly app you will be able to create several versions of the playground and choose the one you like the best in just 5 minutes. Upload a photo of the space you have at your disposal and fill it up with Vinci Play equipment. See what your new playground will look like in the morning, in the evening and during different seasons of the year. You will be able to export the created visualizations to .jpg/.png or .pdf files. Our 3D application will calculate the area needed for the installation of the Vinci Play equipment based on their safety zones, so that your modern playground can meet all the requirements of the EN 1176 standard.

WATCH VIDEO!

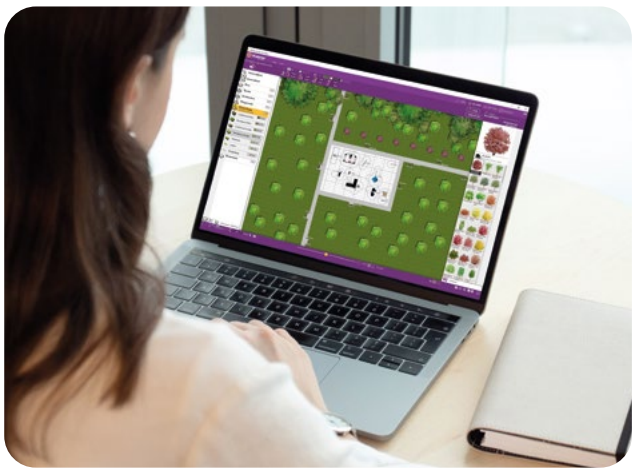

1. How to start?

You can easily name the project, define the size of the area and the shape and size of the playground.

2. Choosing Vinci Play products

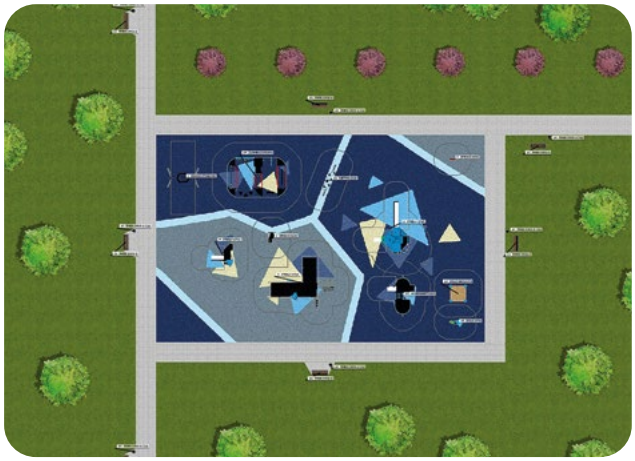

You can search for a Vinci Play product by the age of users, product series, materials or colour versions through a quick and intuitive search engine. The application contains an up-to-date library of all devices available in the offer.

3. Adding products, plants and creating a playground of your dreams

Adding equipment or plants is child's play. As soon as you make your choice - just click on the product (or on a plant) and drag it to the selected area. When putting more products, special attention should be paid to ensure that the safety zones of individual elements do not overlap (this is very important!) - when this happens, the contact area will be highlighted in red.

4. Defining surface texture

Each playground also has a surface. Not all devices can be installed on grass or sand. You can easily sketch various shapes on the surface that can be made of flexible poured surfaces. Just choose a defined shape - circle, square or hexagon, or draw an irregular shape by hand. It is very easy! Then you can choose the colour or texture of each element of the surface.

5. Displaying a 3D view and printing

All steps so far have taken place in top view. It's cool, but the visualization of the playground is something that interests us much more. How to show a 3D view? It's also very easy. Just click one button and the playground we have created will show up in all its glory! The view can be zoomed in and out, shown from different angles, thanks to which we will feel as if we are walking on an already existing playground. We can also quickly print a specific view and leave it with the customer together with the offer.

What's new?

We have prepared many great additions to our existing offer. Modern designs of new products include proposals for younger and older children, large structures, but also smaller thematic devices that will allow you to create the playground of your dreams.

LOW CO_2 EMISSION

Recycled devices

Playground equipment complying with the principles of circular economy, with interesting designs created from posts produced from clothes and foil and panels made of ocean wastes.

High towers

Reach up to the stars! Cone towers with a steel structure, with stainless steel tube slides, bring fun to a new level.

SEE MORE NEW ITEMS

ROBINIA for toddlers

Nice looking wood equipment intended for the youngest children. Jungle animals, sand play equipment and obstacle courses in the smallest sizes are some of the new products in the Robinia series.

QUBIX combinations

Thanks to the modularity of elements in the Qubix series, we have created several combinations with tube slides and rope passages of various heights to give older children unlimited fun on high structures.

ACTIVE series

Especially for golden agers, we have prepared devices that help maintain or restore proper body movement, so that they can enjoy health even longer. Maintaining good shape for years is an important element of the daily routine of seniors.

New thematic devices

Spring riders, slides, vehicles tailored to our flagship thematic series Space, Jungle and Castillo to expand the offer of great fun.

ROBINIA sandplay

New play sets from the much-loved brand, designed specifically to bring even more fun to play with sand. New moving elements, buckets, molds - everything needed for children's favorite fun.

Inclusive STEEL+

A new, larger set in the Steel+ series with ramps for wheelchairs will provide inclusive fun for children of various abilities. The psychomotor development of disabled children is a very important element of playground design.

360° SWING

Swinging, swaying or spinning? Now you don't have to choose! The 360 degree swing will offer unlimited fun and lots of laughter.

ROBINIA shades

A modern playground is not only about fun, but above all about safety. Adjustable shades made of durable material will perfectly protect any playground against excessive exposure to sunlight.

New FITNESS

We have expanded the offer of the very popular Fitness series with new devices: two types of bikes, a trampoline and a rowing machine.

Be more eco with Vinci Play!

Recycled, a better way!

Caring for the future of children and future generations, the idea was born to replace our classic elements of play equipment construction with post-consumer recycled materials. As a result, we have created a group of Recycled products based in 100% on recyclable materials that lower carbon emission.

Towers, slides, ladders, sandboxes, educational panels, spring rockers, swings and complementary elements, such as benches and litter bins - all produced with the use of recyclable materials.

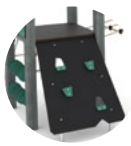

Composite posts

Recycled posts made of an innovative material made of used clothing and foil. The characteristics include, among others that this material: does not corrode, is durable as steel, resistant to algae formation, does not absorb water and is resistant to UV radiation.

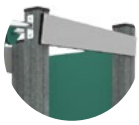

Recycled HDPE panels

Roofs, side panels and moving elements manufactured from ocean waste – fishing ropes and nets. With high durability and resistance to weather conditions these panels allow to create a playground with almost 100% recycled elements, contributing to a healthier environment for future generations.

Plywood platforms

Anti-slip and waterproof platforms and climbing walls made of plywood coated with a hot-pressed phenolic film with a honeycomb surface imprint – it offers increased resistance to abrasion, mechanical damage and chemical agents. It is PEFC-certified.

HDPE with recyled core

A high-quality material resistant to atmospheric agents, i.e. it is waterproof, resistant to frost, UV radiation or moisture. We use three-layer plates (a black core is made of 100% recycled granulate) for the production of various panels, roofs and other playground components.

Stainless steel bars

AISI304 or AISI316 stainless steel bars are used as handrails, fireman's poles, climbing frames, ladders. With a smooth surface, it is completely weather-resistant, thus ensuring its long life span.

HPL elements

HPL panels are being used as supplement in various types of equipment, harmonising with recycled style of the series. This laminate is resistant to chemical and biological factors and weather conditions.

wooden recycled

Wooden now Recycled!

The WOODEN series released now in a new version. Instead of structures made of painted wood, we have included devices from the well-known and popular series in Recycled option.

Various educational and sensory panels, coupled with moving elements, will bring children lots of joy and draw a lot of interest.

The environmentally friendly Recycled equipment from this series stimulates the child's comprehensive physical development and also allows a large group of kids to play together at the same time. Thanks to this, child learns how to establish relationships with their fellows and how to work as part of a team.

solo • recycled

Fun for youngsters!

The SOLO series is a paradise for preschoolers, which is ruled by sand, water, sound and movement.

Free fun develops natural creativity of the child, encourages to do experiments and triggers the desire to cooperate with other children.

The richness of colours, manual and sound elements, along with educational panels: all these elements comprehensively stimulate the senses and the intellectual development of a child.

climboo recycled

Climb, crawl and pull-up

The CLIMBOO series comprises equipment that develops the fitness and coordination of older children, increasing their faith in their own abilities.

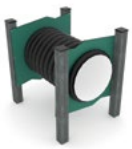

Various climbing ladders and walls with a varying level of difficulty strengthen the muscles and teach the child to concentrate and maintain balance.

This series is the perfect place to organise competitive games where exciting physical challenges are coupled with maximum safety.

spring recycled

Rocking and swaying

The SPRING series equals pure energy on springs. It satisfies the child's natural need for unrestrained and carefree swinging.

Colourful vehicles and happy animals encourage kids to jump energetically and sway in the rhythm of body movements.

The spring riders, which are so beloved by children, allow for joyful fun which also carries great benefits for kids' development.

hoop recycled

Spin, spin!

The HOOP series consists of roundabouts and spinners which drive the world of laughing children.

Spinning is an important activity for the child's development as it promotes the maturation of the nervous system, stimulates the sense of balance, strengthens the muscles and the skeletal system.

swing recycled

Swinging in full swing!

The SWING series includes classic equipment beloved by younger and older children.

Colourful single swings, see-saw swings, multi-swings with bird's nest seats and weight-balanced multi-swings offer a pleasant thrill for children and encourage them to play with their friends.

LOW CO_2 EMISSION

Small park architecture

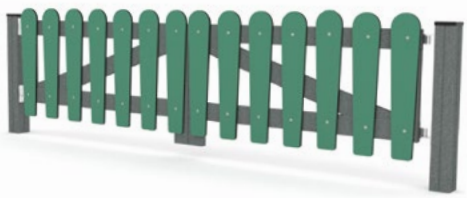

The PARK series is a necessary complement to a kid-friendly playground.

Comfortable benches and tables, colourful litter bins, information boards and fences – all these elements ensure comfortable relaxation for children, their parents and caregivers.

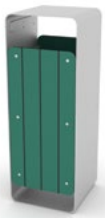

The modern and aesthetically pleasing design of street furniture harmoniously blends in with the playground equipment.

Characteristics of the RECYCLED series:

- 100% recycled HDPE
- Composite construction or elements
- HDPE with recycled core
- HPL HEXA platforms
- Stainless steel construction or elements
- Galvanised steel construction or elements
- Stainless steel slides
- PE tube slides
- Ropes with steel core
- PP tunnels
- Stainless steel chains
- Durable steel spring
- Spinning elements
- Protective tops
- Durable connectors

*Material options apply to selected products, for more information visit: www.vinci-play.com

Be closer to nature with Vinci Play!

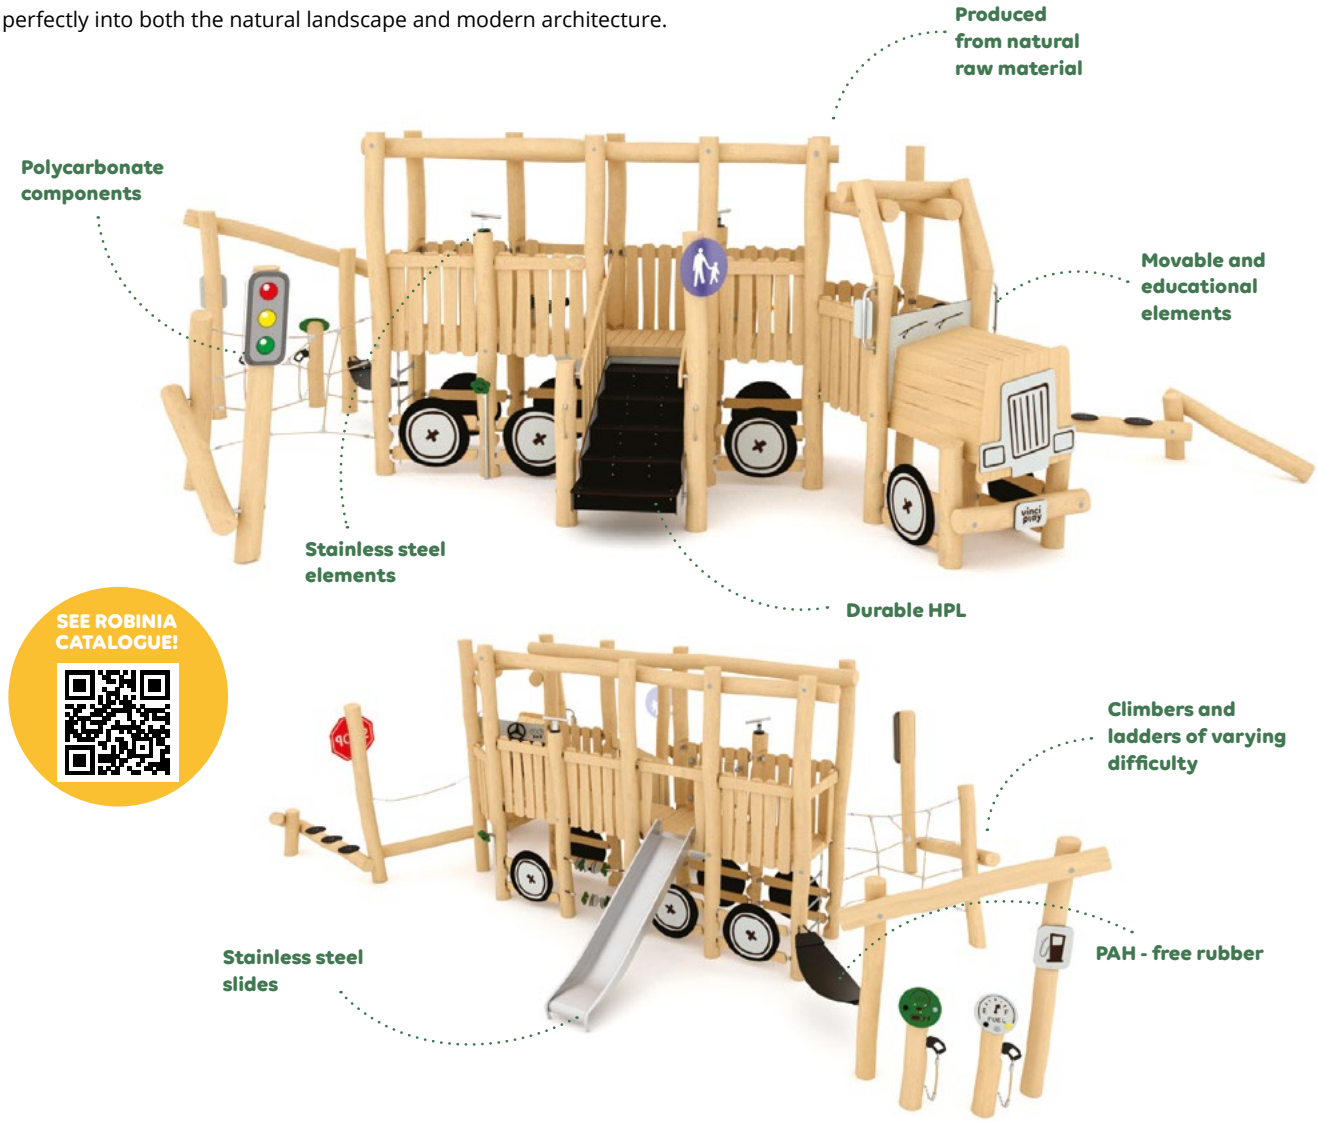

Robinia, naturally!

ROBINIA WOOD

The ROBINIA series is an inexhaustible source of inspiration for play for younger and older children. The variety of educational and sensory panels, as well as moving elements, stimulate in children great interest and joy.

The environmentally friendly, wooden devices in the ROBINIA series stimulate the comprehensive physical development of a child and allow a large group of children to play at the same time. Thanks to this, the child learns to establish relationships with peers, and cooperate in a group.

Over 150 playground-equipment, sports, and small architecture products fit perfectly into both the natural landscape and modern architecture.

Robinia wood

The acacia wood used in the production of the Robinia series contains many oils which protect the material very well against weather conditions, naturally preserving it against rotting processes and pests. By obtaining wood, we are sure that it comes from European plantations with FSC® certification and other controlled sources, thanks to which we care for the future in the spirit of sustainable development.

Safety standards

In order to maintain the unique and irregular nature of the acacia wood, each product is individually prepared in accordance with the safety standards. In the Robinia series, we have developed unique technical solutions ensuring compliance with the EN 1176 safety standard. The products are certified by the international certifying institution TÜV SÜD and TÜV Rheinland. In addition, our production plants undergo periodic control audits by independent certification bodies.

Safe finish

Thanks to the processing of wood by sanding, we smooth its surface, erasing any rough edges or unevenness, so we make the product not only aesthetic but also safe.

Polycarbonate

Our devices are enriched with components made of transparent polycarbonate, which is an excellent alternative to glass. Twice lighter and at the same time two hundred times more resistant to impacts, this material is perfect as a functional and aesthetic detail in devices for playgrounds. Additionally, it is resistant to UV rays, weather conditions and temperatures in a wide range.

Stainless steel

Gutters, troughs and bathtubs made of AISI 304 or AISI 316 stainless steel with a suitably smooth surface finish allow children to play in water and sand. With proper maintenance, stainless steel remains unaffected by weather conditions, which ensures its long service life.

Anti-slip HPL plates

Anti-slip HPL plates are a perfect supplement used in various types of steps and small platforms. Thanks to their highest quality, they are resistant to chemical and biological factors, UV rays, and changing weather conditions. The safe anti-slip structure, subdued colours, and natural look, all perfectly harmonise with the wooden style of the series.

Quick and easy installation

Before shipment, all products undergo preliminary assembly in our factory to prevent jams. We have developed a special connection system, consisting of appropriate undercutting, specialised fastening, and machining holes in key places. Thanks to the clear instructions and the individual marking of the components, it is possible to install quickly and easily, without specialist knowledge and tools.

Packing and transportation

All elements are manufactured in such a way, that it is possible to transport both by road (by bus, or semi-trailer), or by sea or air. The appropriate packing of the elements optimises space and transport costs, and facilitates convenient unloading without the need for cranes or specialist equipment.

robinia

Destination: nature!

The ROBINIA series consists of playground equipment made of natural raw material - Robinia acacia wood, the most durable wood found in Europe. This timber is characterized by natural, bright colours, has high weather resistance, does not require impregnation and can be anchored directly in the ground.

The unique Robinia series has been designed in a comprehensive way to enable creating of an offer containing all types of playground equipment: from tower sets with many climbing elements, through spring riders, carousels and swings, to small architecture.

- Ropes with steel core
- Polycarbonate (PC) panels
- Durable connectors

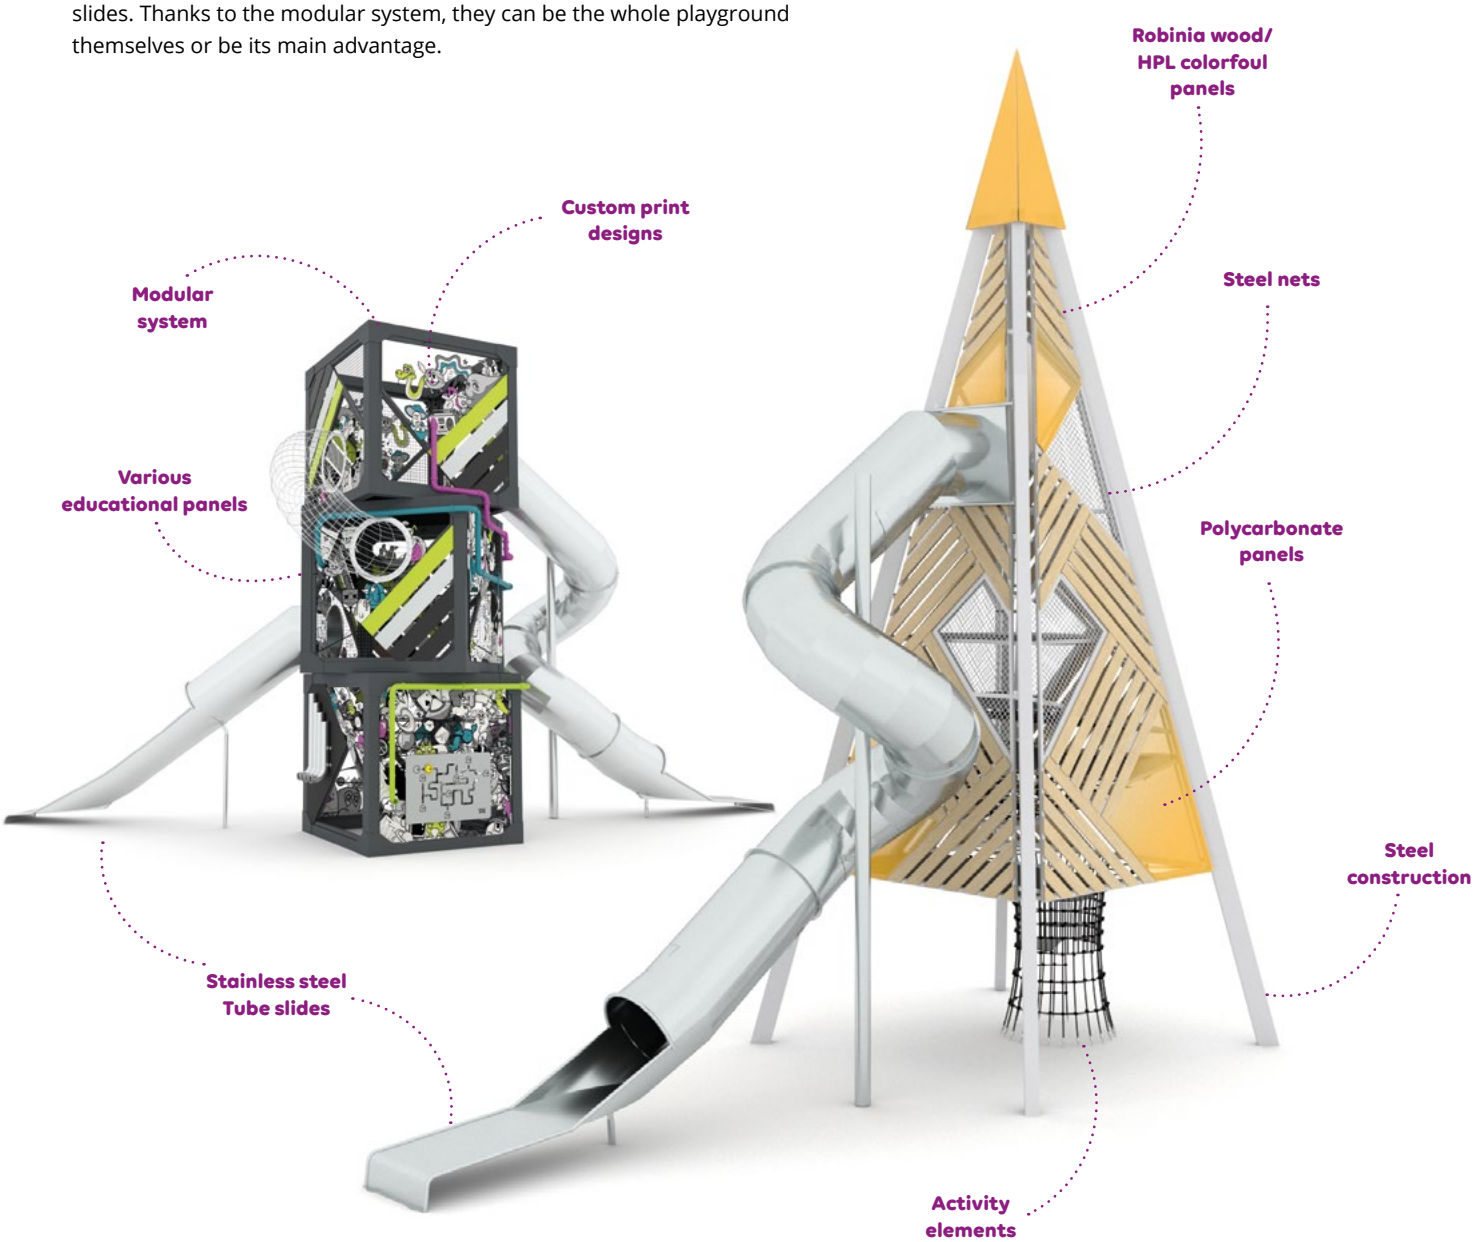

Get higher with Vinci Play!

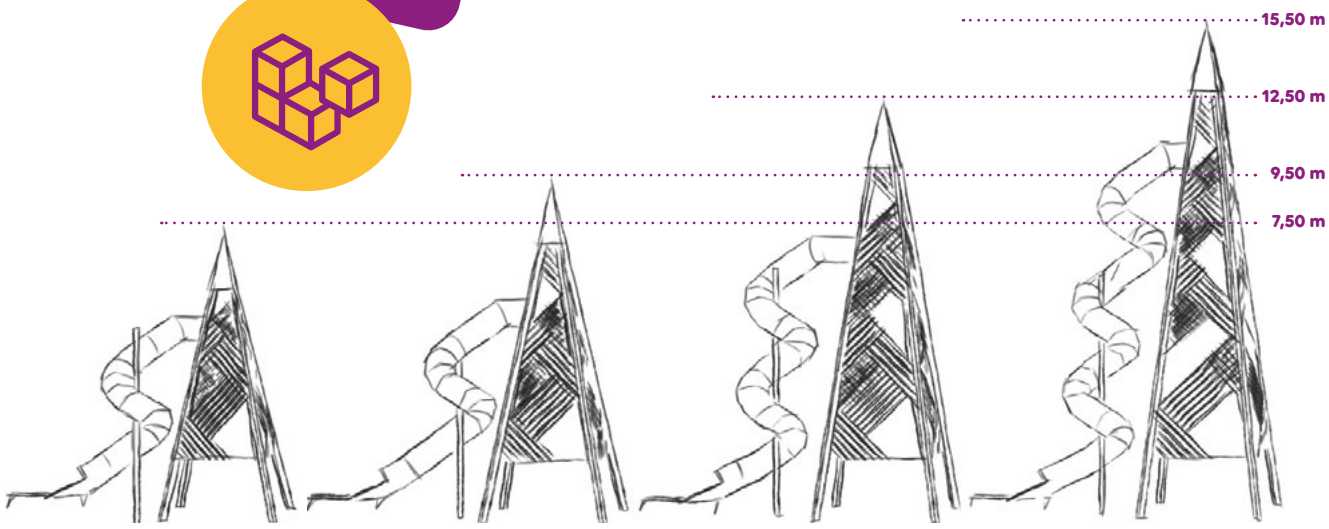

Let's play in the sky!

Tall conical and cubic towers reaching to the sky are a paradise for children. Made of the highest quality materials, with a beautiful design, enriched with educational elements and musical panels, as well as stainless steel tube slides. Thanks to the modular system, they can be the whole playground themselves or be its main advantage.

MODULAR SYSTEM

Construction

Steel construction of high modular tower equipment is made of sturdy profiles hot-dip galvanised and powder coated with UV-resistant paints holding the QUALICOAT certificate available in a great variety of colours. Our products are aesthetically pleasing and prepared with great care to obtain highest quality design requirements.

Modular system

High tower sets can consist of many different configurations. They are available with different height options, can be made of single elements, or connected by steel passages or bridges. This makes them flexible to fit any project.

Educational panels

Various educational elements made of the highest quality HPL panels make the playground more attractive, creating an interesting place not only for teenagers but also for younger children.

Design by Vinci Play

Side walls of tower sets can be made of very durable material, resistant to weather conditions, including UV rays and a wide range of temperatures. Covered with cheerful graphics created from scratch by a team of creative graphic artists, it allows to customize the appearance of any playground.

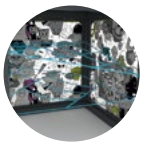

Openwork steel passages

Passages made of thick stainless wire create openwork spiral passages connecting individual parts of equipment. This makes the structure look lighter and allows children to play with a bit of a thrill.

Musical panels

To make it even more fun our products can be boosted by musical elements made of the highest quality stainless steel and colorful talking tubes.

Activity elements

Inside the cubes and cones, there are many activity ladders, nets, and bridges, made of galvanised steel ropes in polypropylene braid, linked with durable fasteners. The rope elements are processed using hydraulic presses with a pressure of 150 tons. These rope nets are a real challenge for children, thus supporting their psycho-motor development.

Stainless steel Tube slides

Slides made of certified AISI 304 and AISI 316 stainless steel with 790mm diameter, sanded surface. Available variants: straight, curved or spiral depending on the design. The entire production process of stainless-steel tube slides is performed by highly-qualified Vinci Play employees. They design the tubes, then roll them with high precision, match all the elements of the device, and finally, connect the components using durable and secure welds.

Qubix

New series!

Have fun in cubes!

The new QUBIX series are geometric constructions filled with activity elements. Their modern design fits perfectly into urban spaces, while providing children and teenagers with a great place to develop their motor coordination. Interesting graphics and symmetrical shapes of steel structures will delight both children and caregivers.

jungle

Wild adventure!

The JUNGLE series will allow you to climb to the heights and conquer the unconquered.

High, up to 9,5 meters above the ground, the greatest adventures will take place like in the crown of trees! Among green leaves, branches and colourful cheerful graphics, everyone will be able to turn into a traveler and explorer.

High tube slides are really fun - not only for small kids, and the climbing elements are a challenge and encouragement to be active.

space

Explore the universe!

The SPACE series is a fulfillment of childhood dreams of space travel.

The towers up to 9,5 meters high, like space rockets, will lift children high above the ground. Colourful graphics, lots of activity and play elements, including tube slides made of the highest quality stainless steel, will not let you get bored.

topicco

Play a role!

A series of role-playing devices: a train station, a fire station, a fire truck, a lighthouse, a ship, a truck or a roller. These devices release a child's natural tendency to play happily and learn the "adult world" as well as engage in teamwork training.

The TOPICCO series offers a number of elements such as educational panels or manual elements that stimulate motor skills and positively affect the intellectual development of young children.

wooden

Equipment from painted wood

The WOODEN series is an endless source of inspiration for both younger and older children how to have fun.

Various educational and sensory panels, coupled with moving elements, will bring children lots of joy and draw a lot of interest.

The environmentally friendly wooden equipment from this series stimulates the child's comprehensive physical development and also allows a large group of kids to play together at the same time. Thanks to this, child learns how to establish relationships with their fellows and how to work as part of a team.

Characteristics of the WOODEN series:

- Wood construction
- Galvanised anchors
- HPL HEXA platforms
- HDPE panels
- Polycarbonate (PC) panels
- Stainless steel elements
- Stainless steel slides
- Durable connectors
- Ropes with steel core
- Protective tops
- PP tunnels
- PE tube slides

Colour & material options*:

Colour (panels):

- C1 HPL - RAL6000
- C2 HPL - RAL3000
- C11E HDPE - multicolour
- C3 HPL - RAL5024
- C9 HPL - wood pattern

Platforms:

- HEXA HPL
- HEXA plywood

Slides:

- Stainless steel
- Fiberglass

Anchoring:

- Surface
- Deep

*Material options apply to selected products, for more information visit: www.vinci-play.com

solo

Fun for youngsters!

The SOLO series is a paradise for preschoolers, which is ruled by sand, water, sound and movement.

Free fun develops natural creativity of the child, encourages to do experiments and triggers the desire to cooperate with other children.

The richness of colours, manual and sound elements, along with educational panels: all these elements comprehensively stimulate the senses and the intellectual development of child.

Characteristics of the SOLO series:

- Stainless steel construction or elements
- Galvanised steel construction or elements
- Wood construction
- Galvanised anchors
- HPL HEXA platforms
- HDPE panels
- Polycarbonate (PC) panels
- Stainless steel slides
- Durable connectors
- Ropes with steel core
- Protective tops
- PP tunnels

Colour & material options*:

Colour (panels):

- C11E HDPE - multicolour
- C12E HDPE - grey/black
- HDPE RAL6024 / HPL RAL6000
- HDPE RAL3020 / HPL RAL3000
- HDPE RAL5015 / HPL RAL5024
- HDPE RAL8024 / HPL wood pattern

Construction:

- Painted steel
- Stainless steel

Platforms:

- HEXA HPL
- HEXA plywood

Slides:

- Stainless steel
- Fiberglass

Anchoring:

minisweet

Colourful series for the youngest

The MINISWEET series consists of playground equipment designed for the youngest children and preschoolers.

Friendly houses, tunnels and slides are an ideal place to have fun together. This is also where the child learns the principles of functioning in a group while perfecting its language skills.

Minisweet devices encourage children to exercise and support the development of key mobility aptitudes. They allow every toddler to enjoy joyful and carefree fun.

steel

Classic tower sets

The STEEL series consists of classic structures that offer unlimited fun for older children. The sets of equipment from this series can be perfectly adapted to the needs of children and the available space.

Rows of towers connected by various attractive movable elements make for a great training ground for motor coordination. They allow a large group of children to play together at the same time, which helps to establish relationships and also teaches teamwork as well as healthy competition.

crooc

Unique houses

The CROOC series is all about beautiful, unique designs, vibrant colours and multi-tower playground sets that allow large group to have fun together.

Fairytale houses encourage children to engage in role-playing activities with their fellows. Element merging platforms, ladders, climbing walls and slides of different difficulty levels comprehensively stimulate the proper motor development of each child.

This series guarantees that the child's energy is channeled effectively.

climboo

Climb, crawl and pull-up

The CLIMBOO series comprises equipment that develops the fitness and coordination of older children, increasing their faith in their own abilities.

Various climbing ladders and walls with a varying level of difficulty strengthen the muscles and teach the child to concentrate and maintain balance.

This series is the perfect place to organise competitive games where exciting physical challenges are coupled with maximum safety.

Characteristics of the CLIMBOO series:

- Stainless steel construction or elements
- Galvanised steel construction or elements
- Wood construction
- Galvanised anchors
- HPL HEXA platforms
- HDPE panels
- Durable connectors
- Ropes with steel core
- Protective tops
- PP tunnels

Colour & material options*:

Colour (panels & construction parts):

- C11E HDPE - multicolour
- C12E HDPE - grey/black
- CASTILLO
- C1 HPL - RAL6000
- C2 HPL - RAL3000

nettix

Ropes, ladders and spinners

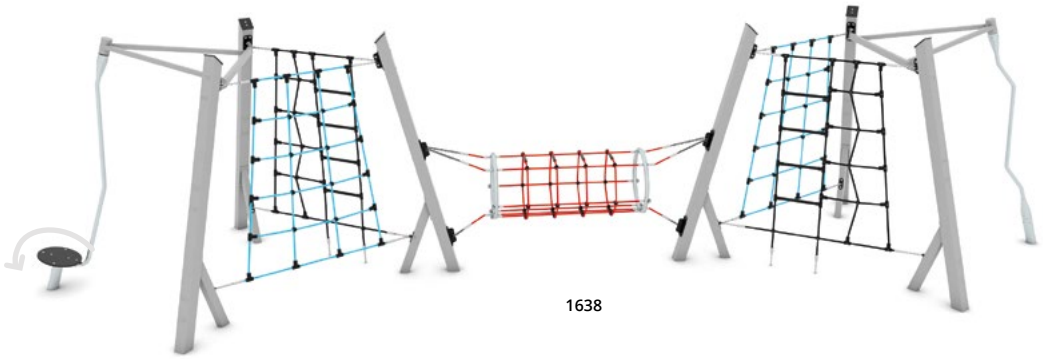

The NETTIX series comprises modern equipment in the form of ladders and rope crossings, which constitute a combination of carefree fun and effective fitness training.

Rope climbing stimulates the sense of balance, strengthens the muscles and improves the child's dexterity. It also encourages children to compete with each other.

This series is a creative adventure among ropes, where the boundaries are set only by the children's imagination.

spring

Rocking and swaying

The SPRING series equals pure energy on springs. It satisfies the child's natural need for unrestrained and carefree swinging.

Colourful vehicles and happy animals encourage kids to jump energetically and sway in the rhythm of body movements.

The spring riders, which are so beloved by children, allow for joyful fun which also carries great benefits for kids' development.

swing

Swinging in full swing!

The SWING series includes classic equipment beloved by younger and older children.

Colourful single swings, see-saw swings, multi-swings with bird's nest seats and weight-balanced multi-swings offer a pleasant thrill for children and encourage them to play with their friends.

Rhythmic swing movement is an effective body balancing exercise that has a positive effect on the development of the muscular and nervous system.

Characteristics of the SWING series:

- Stainless steel construction or elements
- Galvanised steel construction or elements
- Wood construction
- Galvanised anchors
- Stainless steel chains
- Certified swing seats
- Durable connectors
- Protective tops
- Ropes with steel core

Colour & material options*:

Colour (construction parts):

- C1 - RAL6029
- C2 - RAL3020
- C3 - RAL5015
- C4 - RAL1023
- C6 - RAL2009
- C12 - RAL7040
- C13 - RAL9005
- C8 - NCS-S-1060-G-60Y

hoop

Spin, spin!

The HOOP series consists of roundabouts and spinners which drive the world of laughing children.

Spinning is an important activity for the child's development as it promotes the maturation of the nervous system, stimulates the sense of balance, strengthens the muscles and the skeletal system. At the same time it is a source of exciting sensations. For an older child, it is often a favourite place of crazy fun with friends.

Colourful carousels encourage both younger and older children to have fun together.

arena

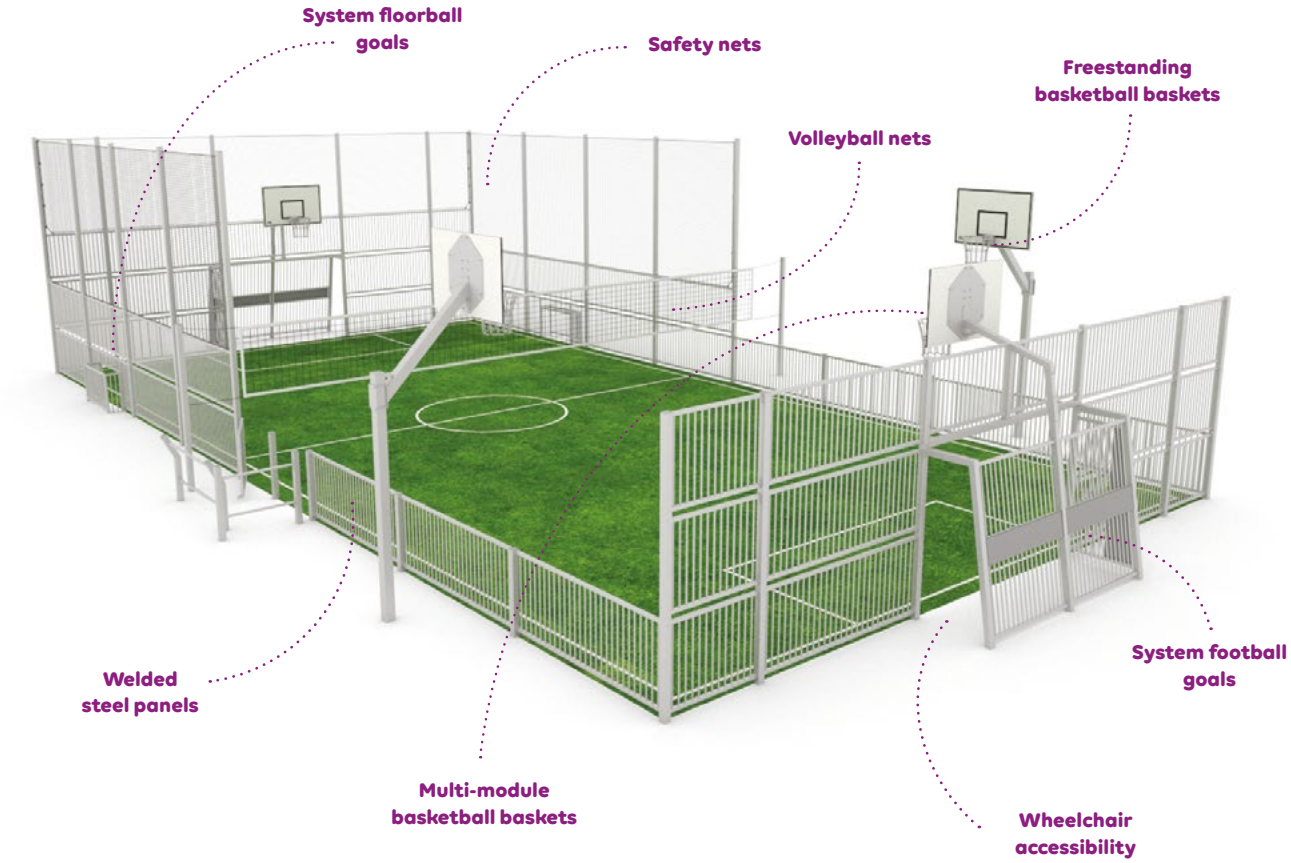

MODULAR SYSTEM

Be like Lewy!

The ARENA is a multifunctional playing field that can be an independent sports facility, perfectly suited for public spaces. In the Arena you can play football, basketball, handball, hockey, tennis and many more.

The highest quality construction and materials are resistant to the loads associated with the use of the field. Thanks to the modularity of the size and functional design, as well as the possibility to choose the material and colour version, the Arena can be adapted to individual needs.

1. Determine the size of the Arena

Using modular side panels, an Arena of any size can be created.

The corners, depending on the needs, can have a right angle or be cut (set at an angle).

2. Choose the design and material options

The structure of the Arena can be secured with a durable hot-dip galvanized coating, or galvanized and additionally secured with a three-layer paint.

Steel modular panels from which we create the Arena come in three options:
- vertical steel tubular profiles permanently welded to the frame, creating a durable, stable structure;
- walls made of HDPE board, resistant to weather conditions, reinforced with steel profiles;
- vertical rails made of recycled composite, resistant to moisture and low temperatures.

3. Set the height

Thanks to the modular panels, the height of the side walls can be freely adjusted to individual needs. Each panel is 1 m high. The durable safety net is available in the height of 2 or 3 m.

There are five combinations to choose from:

- one row of panels;
- two rows of panels;
- three rows of panels;
- two rows of panels + 3 m safety net;
- three rows of panels + 2 m safety net.

4. Select the entrance type

The type of entrance to the Arena can be adjusted to suit any needs. Five types are available:
a panel with an opening, an openable wicket with or without additional blockade against the entry of bicycles, an offset panel or a lockable technical entrance.

MODULAR SYSTEM

7. Choice of complementary elements:

Additional elements of Arena equipment are desgined so that they can be placed anywhere in the walls of the playing field. Four elements to choose from:
- stand-up bench;
- a small “Brazilian” gate;
- free-standing basketball basket;
- volleyball net.

5. Select football goals

Football goals come in four configurations:
- without top panel;
- with top panel;
- with top panel and the basketball basket on the front;
- with top panel and two basketball baskets: front and rear.

6. Pick side elements in the goals

The side walls of the goals come in three variants:
- open;
- with a crossbar to prevent the bicycle from entering the field;
- completely closed (full goal).

jumpoo

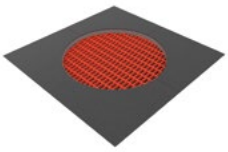

Jump to the sky!

Jumping on the trampolines is a great fun, but also a great training! It allows you to strengthen your muscles, improve fitness and coordination, and at the same time reduce stress and tension, allowing you to relax.

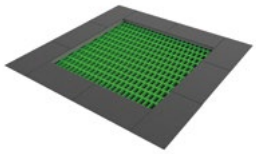

Our trampolines are available in various colours and thanks to the special structure of the elements, any combination of shapes.

Characteristics of the FITNESS series:

- Galvanised steel construction
- Stainless steel construction or elements
- Robinia wood construction
- HPL HEXA platforms
- HPL panels
- Polycarbonate (PC) panels
- Durable connectors
- Protective tops
- Movable elements

Colour & material options*:

Colour (construction in steel):

- C8 - NCS-S-1060-G-60Y
- C12 - RAL7040
- C16 - RAL6013
- C17 - RAL4008
- C3 - RAL5015
- C18 - NCS-S 2040-B10G
- Ci - stainless steel

Construction:

- Painted steel
- Robinia wood
- Stainless steel

Anchoring:

- Surface
- Deep

*Material options apply to selected products, for more information visit: www.vinci-play.com

workout

As fit as a fiddle!

The WORKOUT series designed for development, keeping fit and returning to good physical condition. Steel and wooden structures with many bars and elements for training with the weight of your own body.

Modern design, durable materials and colour options, perfect for creating a contemporary sports ground.

Characteristics of the WORKOUT series:

- Galvanised steel construction
- Stainless steel construction or elements
- Robinia wood construction
- HPL HEXA platforms
- HPL panels
- Polycarbonate (PC) panels
- Durable connectors
- Protective tops

Colour & material options*:

Colour (construction in steel):

- C8 - NCS-S-1060-G-60Y
- C17 - RAL4008
- Ci - stainless steel
- C12 - RAL7040
- C3 - RAL5015
- C16 - RAL6013
- C18 - NCS-S 2040-B10G

Construction:

- Painted steel
- Robinia wood
- Stainless steel

*Material options apply to selected products, for more information visit: www.vinci-play.com

active

New series!

Stay healthy!

Especially for seniors, we have prepared devices that help maintain or restore proper body movement. Keeping in good shape through activity is a very important issue, thanks to which the elderly can enjoy health even longer.

park

Small park architecture

The PARK series is a necessary complement to a kid-friendly playground.

Comfortable benches and tables, colourful litter bins, information boards and fences – all these elements ensure comfortable relaxation for children, their parents and caregivers.

The modern and aesthetically pleasing design of street furniture harmoniously blends in with the playground equipment.

Legend

- Colour variants
- Facilitated access for children with disabilities
- 100% recycled HDPE
- Reinforced belt fabric
- Carousel platforms made of HPL
- Polycarbonate (PC) panels
- Composite panels
- Composite posts
- Steel construction and/or elements made of hot-dip galvanised and powder coated steel
- HPL - the highest quality, water and UV resistant high pressure laminated panels
- Connectors, screws, washers and nuts made of stainless steel and/or galvanised steel protected with plastic caps
- Polypropylene (PP) or Nylon combination ropes with steel core
- Stainless steel (AISI 304 or 316)
  - stainless steel structure
  - stainless handrails and rods
- Anchoring options:
  - deep to the ground – 55 cm
  - to concrete with plates – 5 cm
  - to concrete with plates – 55 cm
- Rubber / PP protective tops
- Spinning elements
- HDPE - high density polyethylene panels
- Stainless steel or PE tube slides
- Climbing stones
- Attested stainless steel chains
- UV printed PC panels
- Construction made of impregnated laminated wood, post dimensions: 90 x 90 mm
- Steel spring 20 mm, sand-blasted, iron phosphated and double powder coated
- Stainless steel or fiberglass slides with side panels made of HDPE or HPL
- Tunnels made of durable, vandal-proof, double-layered material
- Certified swing seats:
  - Flat seats of rubber compound with aluminium insert
  - Toddler seats for small children with soft gripping
- Platforms and climbing walls made from anti-slip and waterproof plywood or HPL HEXA panels – effective protection against environmental factors and wear-resistant
